PROFILE SUMMARY

Experienced Unity Game Developer with over six years across mobile, multiplayer, and live-ops titles. Proven track record building scalable game systems, developer tooling, and production pipelines. Passionate about clean architecture, efficient workflows, and shipping games that players love.

TOOLS & SKILLS

Languages

- C#

Game Engine

- Unity

Networking

- Photon Fusion
- Photon PUN

Backend

- Firebase
- Google Cloud

Other

- GIT
- CI/CD Pipelines
- Rest APIs

WORK EXPERIENCE

Gameberry Labs, Bangalore

MAY 2025 - PRESENT

Game Developer II

- Worked on Draw Match Kingdom, a casual mobile game.
- Refactored core systems to improve code maintainability and scalability.
- Built and maintained live ops features and a debug menu toolset for QA and production teams.
- Extending and maintaining a GitLab CI/CD pipeline for automated Unity builds, including branch selection, S3 upload, and Slack notifications; added feature tagging and fixed webhook status updates
- Contributed to server-side features on GCloud infrastructure, including API integration and payment flow migration from WebSockets to HTTP.

Holy Cow Productions, Bangalore

APRIL 2021 - DECEMBER 2024

Game Developer

- Developed multiple games, across mobile and webgl platforms, including Agents of Influence, Kings Kombat, Kings Defence, and Kings Royale.
- Architected multiplayer systems using PUN and Photon Fusion.
- Created flexible design architectures to facilitate future project expansions.
- Designed developer tools to streamline level creation and improve team workflow.
- Collaborated closely with art and design teams to ensure smooth project experience.

Digikhel, Bangalore

JANUARY 2021 - APRIL 2021

Intern Game Developer

- Independently developed three unique mobile games
- Designed and implemented a local pseudo-multiplayer system with data recording and replay functionality.
- Created comprehensive UI packages.

Lazy Couch Studio, Bangalore

MAY 2017 - MAY 2018

Game Developer

- Worked on diverse client-facing projects including Rush Kart Racing 3D and hypercasual games
- Implemented advanced optimization techniques such as mesh compression and object pooling
- Integrated multiplayer functionality using Photon Unity Networking (PUN2)

Arcanheim Interactive LLP, Pune

DECEMBER 2016 - FEBRUARY 2017

Intern Game Developer

- Contributed to the development of Tale of Prisso, a puzzle game focusing on light mechanics

EDUCATION
