WORK EXPERIENCE

Holy Cow Productions, Bangalore

APRIL 2021 - DECEMBER 2024

Game Developer

- Developed multiple games including Agents of Influence, Kings Combat, Kings Defence, and Kings Royale
- Led the development of multiplayer systems and data synchronization between games and websites
- Created flexible design architectures to facilitate future project expansions
- Designed developer tools to streamline level creation and improve team workflow
- Collaborated closely with design and development teams to ensure smooth project transitions

Digikhel, Bangalore

JANUARY 2021 - APRIL 2021

Intern Game Developer

- Independently developed three unique games including a word search competition game and a dungeon racing game
- Designed and implemented a local pseudo-multiplayer system with data recording and replay functionality
- Handled complete development cycle including coding, visual design, and audio integration
- Created comprehensive UI packages including main menu and game over screens

Lazy Couch Studio, Bangalore

MAY 2017 - MAY 2018

Game Developer

- Worked on diverse client-facing projects including Rush Kart Racing 3D and hypercasual games
- Implemented advanced optimization techniques such as mesh compression and object pooling
- Integrated multiplayer functionality using Photon Unity Networking (PUN2)
- Developed reusable packages for Google Play Games integration and UI functionality
- Created and integrated leaderboard systems for multiple game projects

Arcanheim Interactive LLP, Pune

DECEMBER 2016 - FEBRUARY 2017

Intern Game Developer

- Contributed to the development of Tale of Prisso, a puzzle game focusing on light mechanics
- Implemented complex light refraction and gravity well mechanics
- Assisted with animation integration and player movement optimization
- Developed features using Unity game engine
